International Journal of Fracture

CONTENTS OF VOLUME 90 (1998)

Vol. 90, Nos. 1–2, 1998

Preface		v
Foreword		vii–ix
An experimental/analytical comparison of three-dimensional deformations at the tip of a crack in a plastically deforming plate I: Optical interferometry and experimental preliminaries	C.R. SCHULTHEISZ, R.D. PFAFF and W.G. KNAUSS	1–25
An experimental/analytical comparison of three-dimensional deformations at the tip of a crack in a plastically deforming plate II: Material characterization and finite element analysis	C.R. SCHULTHEISZ, R.D. PFAFF and W.G. KNAUSS	27–46
An experimental/analytical comparison of three-dimensional deformations at the tip of a crack in a plastically deforming plate III: Comparison of numerical and experimental results	C.R. SCHULTHEISZ, R.D. PFAFF and W.G. KNAUSS	47–81
Dynamic fracture of nominally brittle materials	K. RAVI-CHANDAR	83–102
Loading rates and the dynamic initiation toughness in brittle solids	C. LIU, W.G. KNAUSS and A.J. ROSAKIS	103–118
Fracture roughness evolution during mode I dynamic crack propagation in brittle materials	K. TAKAHASHI, M. KIDO and K. ARAKAWA	119–131
Energy balance in dynamic fracture, investigated by a potential drop technique	J.A. HAUCH and M.P. MARDER	133–151
Experimental determination of dynamic crack initiation and propagation fracture toughness in thin aluminum sheets	D.M. OWEN, S. ZHUANG, A.J. ROSAKIS and G. RAVICHANDRAN	153–174

Vol. 90, No. 3, 1998

A nonlinear finite element eigenanalysis of singular plane stress fields in bimaterial wedges including complex eigenvalues	NINGSHENG ZHANG and PAUL F. JOSEPH	175–207
Fracture in off-axis unidirectionally reinforced ceramic composites	ALEX S. SELVARATHINAM	209–234
A state-space model of fatigue crack growth	RAVINDRA PATANKAR, ASOK RAY and AKHLESH LAKHTAKIA	235–249
Singularity analysis and boundary integral equation method for frictional crack problems in two-dimensional elasticity	K.T. CHAU and Y.B. WANG	251–274
T-stress of an interface macrocrack induced by near tip subinterface micro-cracks	LI-GUO ZHAO and YI-HENG CHEN	275–285

Vol. 90, No. 4, 1998

An analysis of chipping in brittle materials	W.C. CHIU, M.D. THOULESS and W.J. ENDRES	287–298
A finite element analysis of fracture initiation in ductile/brittle periodically layered composites	M. JHA and P.G. CHARALAMBIDES	299–323
Plane stress crack tip field around a rapidly growing ductile/rigid interface crack	XIAOMIN DENG	325–340
Macrocrack extension by connecting statistically distributed microcracks	SULIN ZHANG and WEI YANG	341–353
A study of the fracture behavior of unidirectional fiber-reinforced composites using Coherent Gradient Sensing (CGS) interferometry	C. LIU, A.J. ROSAKIS, R.W. ELLIS and M.G. STOUT	355–382
Designation of mode mix in orthotropic composite delamination problems	S.H. NARAYAN and J.L. BEUTH	383–400
Volume contents		401–402
Author index		403

International Journal of Fracture

CONTENTS OF VOLUME 90 (1998)

Vol. 90, Nos. 1–2, 1998

A failure mechanism map for angle notch Charpy tests on a mild steel	L.P. POOK and M.J. PODBURY	L3–L6
On stress intensity factors for an external crack of arbitrary shape	LI XIAN-FANG, SUN YING-FEI and FAN TIAN-YOU	L7–L12
On a model of ductile-brittle transition by the fracture of solids	LEV B. ZUEV	L13–L18
Micromechanics of stress corrosion cracking in progressively drawn steels	J. TORIBIO and E. OVEJERO	L19–L24
Elastic-plastic study of a mixed mode semi-infinite crack by using the Dugdale model	J. LI	L25–L29
Paper strength: Statistics and correlation structure	M. DIMILLO and M. OSTOJA-STARZEWSKI	L31–L36

Vol. 90, No. 3, 1998

Stress intensity factor for semi-infinite crack formed by moving thermal source	A. KOTOUSOV and J.W.H. PRICE	L39–L42
On propagation of small surface breaking cracks	A. KOTOUSOV and J.W.H. PRICE	L43–L47
Near-tip deformation of a crack under gross section yielding	C.H. WANG and M. CHAO	L49–L54

Vol. 90, No. 4, 1998

Mechanics of self-affine cracks in carton	ALEXANDER BALANKIN, JORGE MENDEZ, GOMEZ MANCILLA and GUILLERMO URRIOLAGOITIA	L57–L62
Analysis of ballistic properties of layered targets using cavity expansion model	GABRIEL BEN-DOR, ANATOLY DUBINSKY and TOV ELPERIN	L63–L67
Stress intensity factors for a planar crack by the self-similar crack extension method	LI XIAN-FANG and FAN TIAN-YOU	L69–L74
